ACCOMPLISHMENT REPORT

Submitted by:

Shawn Marie V. Catana

Diploma in Computer Engineering Technology

A.Y. 2021 – 2024

Introduction

As a 3rd year student part of the Dual-Training System program in CITE Technical Institute, I have had the opportunity to undergo On-the-Job Training program at NEC Telecom Software Inc. during the academic year of 2023rd of February.

Practicum Experience

During my 3-month On-the-Job Training, I underwent initial training to familiarize myself with techniques, methods, technologies, and task management. Following this, I, along with my colleagues, participated in a small project to assess our skills and understand job complexities.

This experience emphasized the significance of communication, documentation, and project approach. After identifying our strengths and weaknesses, I transitioned to different teams. Initially, my tasks involved assistance, and later, I took on the responsibility of improving or creating a newer version of a previous project.

Accomplishments

I am proud to highlight some of the key accomplishments and contributions I made during my OJT:

1. **Team Collaboration:** Actively participated in team meetings and collaborative projects, fostering a positive and productive work environment.
2. **Feature Enhancement:** Contributed in testing and creating a newer version of an extension to be used by teams.
3. **User Feedback Implementation:** Actively incorporated user feedback and suggestions into the upgrade, addressing user concerns and preferences to enhance the overall usability of the extension.

Impact to the Field of Specialization

The on-the-job training, I had done under the NEC Telecom Software served as a motivation for me to improve myself and be better as a Computer Engineering Student and aspired me in my pursuing my future career as a professional Software Engineer in the near future.

Conclusion

In conclusion, my OJT at NEC Telecom Software Inc. has significantly contributed to my academic and professional growth. The hands-on exposure to real-world scenarios enhanced my understanding of Computer Engineering Technology and imparted practical skills beyond classes.
